

DáNIEL NEL

Future Thinker.

“ I have spent a decade at the helm of a leading South African Pharmacy Group, honing my insights. From an early age, my unwavering passion has been driven by the promise of tomorrow, particularly in the realms of innovative health solutions and the boundless possibilities of Artificial Intelligence. My relentless dedication is focused on not just redefining the future of business, but also on delivering unprecedented value to the communities of South Africa. At the core of my values lies the belief that every individual possesses the potential to reach great heights, even when they doubt themselves. This belief fuels my journey as I work tirelessly to create an ecosystem where success is within reach for all. My dream, though seemingly audacious to some, is clear to me—I aim to be a driving force in creating job opportunities for one million people.

01

PHARMACEUTICAL BACKGROUND

“ From an early age, my father's mentorship at the **Arrie Nel Pharmacy Group** instilled in me the values of strategic thinking and self-reliance. Over the course of more than ten years of dedicated commitment, my teams and I collectively expanded the group's presence to serve over 4,000 institutions, which include pharmacies, hospitals, and doctors throughout South Africa. Our efforts propelled these entities forward through the implementation of cutting-edge software integration. In my role as the Head of Buying, I successfully managed annual budgets totaling several billions of rands while overseeing a formidable team consisting of over 6,000 individuals. However, when the seismic shift toward proactive healthcare emerged in the wake of COVID-19, I made a bold decision. I stepped away from my father's legacy to pursue my own fervent passion for revolutionising healthcare for the better.
